

K4 'FLEX' - For looseness and grip

Original fin for performance wave riding. Lots of flex for amazing grip and looseness on the wave. Raked template for control. A progressive foil for different flows between tip and base. Test winner. Will loosen up a 'stiff' board and are particularly sweet as twin fins as they eliminate that unwanted top turn spin out.

Flex: HIGH

Sizes 13-17cm US SLOT heads.

LENGTH	HEAD	AREA	WEIGHT
17	US/SLOT	142	135
16	US/SLOT	133	125
15	US/SLOT	122	115
14	US/SLOT	108	100
13	US/SLOT	98	85
12	US	86	75

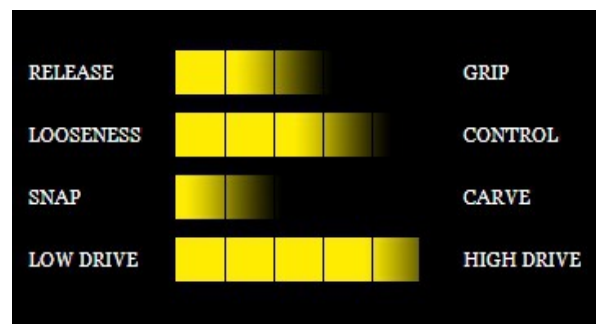

K4 'ROCKET' WAVE - Fast and lifty fins. Smaller sizes ideal as trailers

Almost like having slalom fins in your waveboard! Lift, drive and speed for onshore conditions. Great for early planing and jumping. Also surprised us with their DTL performance but you'll need to use your rails for powerful turns as they don't have the same grip'n'whip in big cut backs and snaps as the flexier fins.

Flex: LOW

Sizes: 14.5, 15.5, 16.5, 17.5, 18.5 US SLOT heads. 16.5, 17.5 and 18.5 now available in POWERBOX

LENGTH	HEAD	AREA	WEIGHT
17.5	US/SLOT	138	128
16.5	US/SLOT	130	121
15.5	US/SLOT	116	105
14.5	US/SLOT	109	101
13	US/SL/MT	86	78
12	US/SL/MT	76	70
10	US/SL/MT	58	55
8	US/SL/MT	39	40

K4 'STUBBIE' - Allround fin for heavier riders or varied conditions

Stiffer and larger area line of fins for riding.

Great for heavier riders applying greater power in high wind and wanting more drive in low wind.

Also suitable for lighter riders in onshore conditions

or for those wanting more 'release' to learn

taka's and other wave/freestyle moves.

Upright template gives better 'pivot' for in the pocket riding.

Flex: MEDIUM

Sizes 14, 15, 16, 18cm US SLOT heads. 16 and 18 now available in POWERBOX.

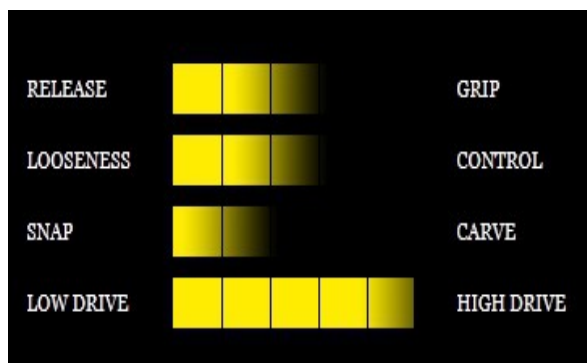

Stubbies in a smaller size so it's easier to compare the template with the other possible front options of SHARK and CARVE. Ratings are given as a front fin rather than rear. A great front fin choice for riders wanting maximum area and hold. Works well for all fin configurations.

Flex: MEDIUM

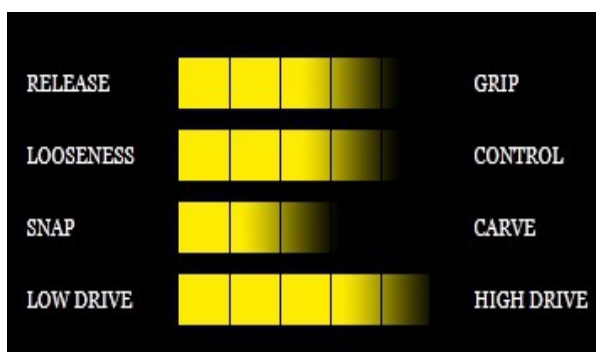

Sizes 8,10,12,13, 14cm US SLOT MT heads.

LENGTH	HEAD	AREA	WEIGHT
18	US-SLOT	154	148
16	US-SLOT	130	125
15	US-SLOT	119	111
14	US-MT-SLOT	109	98
13	US-MT-SLOT	99	88
12	US-MT-SLOT	90	78
10	US-MT-SLOT	69	62
8	US-MT-SLOT	47	41

Sizes : 14 - 18

Sizes : 8 - 13

K4 'SHARK TOOTH' FRONTS

Front fin for looseness and speed. If you're getting all the grip and drive you need from the rear fins, this is a great front fin for loosening up your quad. Test winner.

Flex: MEDIUM

Sizes: 6,8,10cm all heads.

LENGTH	HEADS	AREA	WEIGHT
10	MT-US-SLOT	56	52
9	US	47	45
8	MT-US-SLOT	39	40
7	US	31	35
6	MT-US-SLOT	25	28

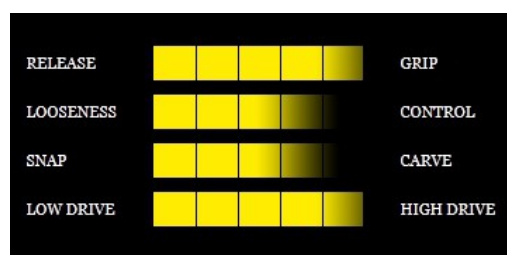

K4 'CARVE' FRONTS

Front fin for drive and control. Great for big sweeping curves and gouges. Swept flexy tip for maximum grip, high rake for control and wide base for drive.

Flex: MEDIUM

Sizes: 12,14cm US SLOT MT heads.

LENGTH	HEAD	AREA	WEIGHT
14	MT-US-SLOT	118	103
13	MT	111	92
12	MT-US-SLOT	104	84
11	MT	98	76

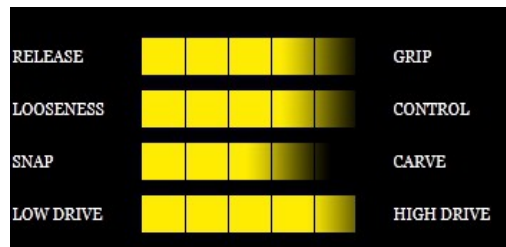

K4 EZZY ASYMMETRICS

The Ezzy Asymmetric fin! More power, more drive, more speed, less drag. This fin has a similar template to the Stubby but with an even wider base. Fully asymmetric foil with a radiused front and slightly positive inner foil to aid flow at high speeds. Choose a smaller fin size for less drag, same power. Great for huge gouging hooky cut backs.

Flex: Medium

Sizes: 8,10,12,14 US MT SLOT 1,2 or 3 degree toe

LENGTH	HEAD	AREA	WEIGHT
14	MT-US-SLOT	113	85
12	MT-US-SLOT	93	72
10	MT-US-SLOT	72	58
8	MT-US-SLOT	49	44

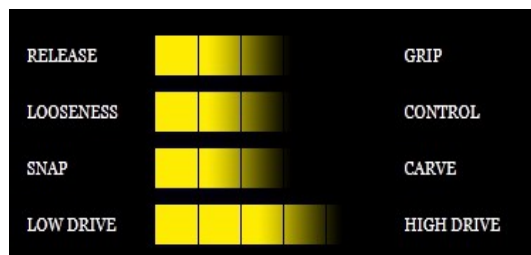

K4 'BUBBLE' FREESTYLE

Freestyle fin developed by Andy 'Bubble' Chambers. We originally had two very different prototypes; one worked great on flat water but would spin out in the chop, the other was rock solid in the chop but too grippy on flatwater. The BUBBLE freestyle fin has the perfect blend of grip to be secure in the chop and into carving manuevres, whilst still allowing plenty of release for double spins.

Sizes: 16,18,20cm US/POWERBOX.

LENGTH	HEAD	AREA	WEIGHT
20	US/POWER	175	182/202
18	US/POWER	153	152/175
16	US/POWER	125	135/151
14	US/POWER	100	95/125
