

## K4 Fins Size Guide

Fin sizes at a glance for a 75Kg (165lb / 12stone) wave sailor on an 85ltr board, then a 75ltr board for below 5.0 sizes at a glance for a 75Kg (165lb / 12stone) wave sailor on an 85ltr board, then a 75ltr board for below 5.0

SAIL SIZE	TWIN	TRI	QUAD
5.7	17	12f 16r/18r	10f 15r / 8f 16r
5.3	16	12f 16r	10f 14r / 8f 15r
5.0	16	12f 15r / 10f 16r	8f 15r
4.7	15	12f 14r / 10f 16r	8f 14r
4.2	15	10f 15r	8f 14r
3.7	14	10f 14r	8f 13r

These sizes will actually be similar to the sizes you would use in G10 but feel looser, lighter, grippier, more controlled with more drive and hold through the turns, at the expense of some low end early planing power. You'll also notice the flex will sling-shot you out of your turns and provide grip at extreme angles where stiffer fins would leave you bum checking as the tail slips away.

Please note that wider boards and/or heavier/taller and/or less skilled riders will require longer fins than those shown in the table and vice versa.

In really windy choppy weather, you may also choice bigger fins to make the board more 'planted'  
Please read the tuning section for a more indepth analysis on fin choice and a greater selection of fin options.
